

Pathways Learning Experience

The Pathways Learning Experience represents a significant change to our Toastmasters education program. With an expected release to our clubs in early December, it's important to understand what this new program offers and the benefits to our members.

Your club may have already been visited by your Pathways Guide and Pathways Ambassadors. These volunteers are assigned to help you and the club officers during the transition to Pathways. This session will discuss additional details of Pathways and Base Camp, provide tips for marketing using Pathways, managing the transition and a forum to answer your questions.

Nancy Starr-Cassidy joined Papago Toastmasters in 1987 and has seen significant changes to our program in those 30 years. Having taken full advantage of the Leadership track, Nancy served on the International Board of Directors in 2004-2006 and served on the team that introduced the original Competent Leader manual. As the Learning Technology Manager at SRP, she is responsible for the corporate Learning Management System (like Base Camp), so her worlds are colliding with the introduction of Pathways. Appointed as District 3's Chief Ambassador over four years ago, she is excited to finally be sharing the new program with members.
